

INTELLIGENCE COMMUNITY STAFF

26 March 1976

NOTE FOR MR. LEHMAN

Dick:

Attached are IC Staff comments on your production paper.

Just to vote my personal ballot:

(a) I believe some form of collegiality must be built into the individualistic NIO system (and George Carver is at work on a plan);

(b) The Steering Group meets the command problem but strikes me as cumbersome, almost certain to be delegated to staff supernumeraries and removes control of the drafting which is essential to a responsive, quality product;

(c) Some way must be found to link substance and resource management; the latter cannot be done in vacuo.
